## Trussbilt's New Online Course Provides AIA Credits

July 25, 2013

Vadnais Heights, Minnesota — Trussbilt is now offering an AIA course called *Detention Design and Construction with Truss-reinforced Steel Panels*. Professionals who take this course will earn one AIA Health, Safety and Welfare Design (HSW) hour. It is available online for free—24 hours a day, 7 days a week. It takes approximately one hour and is followed by a brief quiz.

Timothy Browne, President and CEO of Trussbilt, said, “In the fast-paced world of the detention industry, it can be a challenge for design professionals to stay abreast of the latest building methods. This course teaches architects the most effective ways to design and construct a detention facility.”

Mr. Brown continued, “It was important to us to provide this course in an online “self-serve” format. I’m sure architects will appreciate being able to earn AIA hours from work or home—on weekdays or weekends.”
